

Step 1: Inspect Your Test Kit

Please read these instructions carefully before you start to collect the sample:

IMPORTANT: Ship your sample within the same day of your collection. Do **NOT** register, collect, or ship your sample on a **Saturday or Sunday**.

1. Inspect your test kit to ensure all components are included:

Nasal swab

Collection tube

Biohazard bag

UN3733 return envelope

Prepaid return label

2. Please take a picture of your prepaid return label for tracking purposes.

Step 2: Register Your Test Kit

1. Before collecting your sample, use your personal device to register at <https://covid19-test.pedicine.com/activate> or scan the QR code below with your camera app. →

If registration is successful, a confirmation email will be sent. If you do not receive a confirmation email please contact us at covid19-test@pedicine.com

Collection Video Tutorial: Please visit <https://vimeo.com/639329170> or scan the QR code below with your camera app.

If you have any questions, contact us at:
covid19-test@pedicine.com or (650) 300-2188

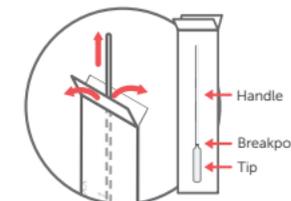

You can also check out our FAQ page at: <https://covid19.pedicine.com/#FAQ>

Step 3: Collect Your Sample

IMPORTANT: Before collecting your sample: 1. Thoroughly wash and dry your hands & 2. Do not rinse your nasal cavity.

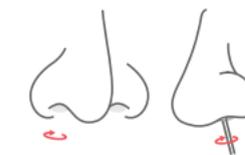

Warning:

1. Small cap may pose choking hazard; keep out of reach of children when not in use.
2. You may experience sneezing, coughing or tearing during the sample collection.
3. The tip can **ONLY** touch the inside of the nostril.

1. Take out nasal swab

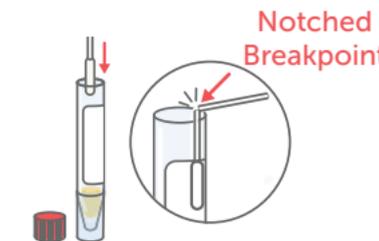

Pull out the nasal swab from the wrapper by pulling the two ends of the wrapper apart (like you would to open a band-aid). Be careful to only touch the handle, not the tip.

2. Swab nose

Gently insert the **entire** soft tip of the swab into one nostril until you feel a bit of resistance and rub it in a circle around your nostril **4-5 times**. **Repeat in other nostril.**

WARNING:
For young children,
do not insert
swab greater than
0.5 inches.

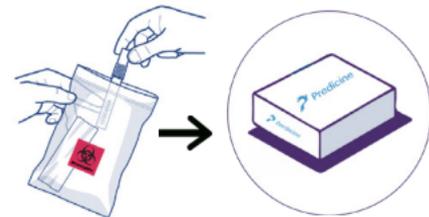

3. Break off swab handle at the notched breakpoint on the handle

Open the collection tube. Place the swab, tip first, into the collection tube. **Break off** the swab tip at the notched breakpoint by bending back and forth at the top of the tube. The broken off handle can be discarded. Seal the collection tube using the same cap. Do not over-tighten the cap.

Step 4: Pack and Ship Back Your Sample

IMPORTANT: After collecting your sample: Thoroughly wash and dry your hands.

1. Place tube in biohazard bag and put the bag in the box

Place the sealed tube into the biohazard bag and seal the bag. Put bagged sample back inside the box. If you decide to drop off your sample at your local drop off location, please ignore the the next 2 steps.

2. Place box into mailing envelope

Place the box into the provided return envelope. Apply the prepaid return label and seal the envelope. Do not cover the UN3373 label.

3. Ship your sample via local courier facility

 Promptly ship your sample back via your local courier facility. Ship your sample before the last Express pickup of the day. Note: do not ship from 3rd party locations (eg., CVS, Walgreens, RiteAid, etc.)

IMPORTANT: If you do not receive a confirmation email after 2 days, please check your courier tracking number that you recorded from, "Step 1".

Step 5: Checklist

IMPORTANT: If you cannot check all of the boxes below, your sample cannot be processed

- I registered my kit.
If you have not registered your kit please go back to step 1.
- I collected a sample from both nostrils.
- The nasal swab tip only touched my nostrils.
- I have placed the tip of the swab into the collection tube and broke the handle at the notched breakpoint.
If you do not break the swab at the notched breakpoint, it can harm our machines and we will be unable to process your sample.

IMPORTANT: Results are expected to be delivered within 48 hours after sample receipt. Please contact us if you do not receive results within this time period. Results will be delivered electronically by text or email with a link to view your report. A text or phone call is made for all positive, invalid, or rejected specimens.
